

Nature's Fury

Earthquakes - Follow this link to a site about earthquakes for kids and then work through the questions to find out more about these natural disasters. Put your answer in the same box as the question.

<http://earthquake.usgs.gov/learning/kids.php>

Click on the "Latest Quakes" link. What was the most recent quake of over 5.0 magnitude in the world.

Click on the "Puzzles and Games" section and then drag down and click on "Earthquake Quiz". How many of them did you get correct?

Go to the "Today in Earthquake History" link. What is one event that took place on this date? Include the year, magnitude, location and any comments.

Hurricanes

Use the sites below the text box to research hurricanes. Then in the text box, write an imaginary story about a child that lives where hurricanes are common and is caught in a Category 3 hurricane and must evacuate their house. Be sure to talk about how they prepared for this emergency and how they got out safely with their pets and family. Be sure to use correct terms and facts, such as the wind speed, that you might find in this level of hurricane and where the child might be living.

Write your story here...
