Risk Taken	Positive Consequences	Negative Consequences

These people are from vastly different backgrounds, but their stories also have similarities. Formulate a generalization that explains what you feel is true of all or almost all risk takers.

Statement of Generalization
By studying the lives of these risk takers, it is my opinion that almost all risk takers...

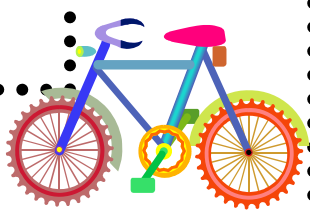

Unnecessary Risks - Are you taking unnecessary risks when you ride your bike? Begin by going to the site next to the bike and evaluating your own bicycle safety.

Which of these 10 rules do you honestly follow?

Which of these 10 rules do you NOT follow as much as you should?

Make a commitment? Now that you know more, which of the rules are you committing to follow every time you ride a bike?

<http://www.cpsc.gov/cpsc/pub/pubs/343.html>

You are learning that there are consequences for risks taken. Sometimes the consequences are positive and sometimes they are negative. Follow the link below to the site about bicycle helmets explain some of the negative consequences of not utilizing helmets correctly. Some of the ideas are right in the text and some of them come from your ideas based on your reading.

http://kidshealth.org/kid/watch/out/bike_safety.html

You don't wear a helmet when you ride your bike to your friend's house.

Consequence-

Your bicycle helmet is too big or you wear a hat under your helmet.

Consequence-

You throw your helmet on the ground of the garage when you get home.

Consequence-
